ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(54) Title: MULTI-LAYER FILM-STRUCTURE, ESPECIALLY MULTI-LAYER FILM LABEL STRUCTURE

(57) Abstract: The invention is concerned with a multi-layer film structure (1), especially film label-structure having a shrinkability, produced preferably in the coextrusion process, with a first (3) and a second (4) outer layer and a third inner layer (2) between the first (3) and second (4) layer, all layers consisting essentially of polystyrene. In order to achieve an advantageous label stock, the invention proposes, that the first (3) and second (4) layer are by weight approximately 50-75 % of the overall weight of the label-structure, that the overall thickness is in the range of 0,5 to at least 4 mils (0,012 to 0,102 mm) and that the first (3) and second (4) layer consist of general, purpose styrenic resin, whereas the third layer (2) is a modified tough polystyrene, such as "K-resin" of Philipps Petroleum Chemicals.
